

TOTAL SCORE: ____ / 100
DOCUMENTATION REQUIREMENT

Student Name: Joaquim Iñigo L. Rojo

Date: 08/26/26

VM Name: ROJO-ELECTIVE-BSIT3B

1. VM Specifications Summary

Component Allocated Value

VM Type / OS Ubuntu (64-bit)

RAM GB (**8704** MB) CPU Cores **4**

Hard Drive Size: **100** GB (Dynamic / Fixed) Storage Controller

SATA / SCSI

Network Adapter NAT / Bridged

ISO File Used: ubuntu-26.04-desktop-amd64.iso

2. Step-by-Step Setup Process

(Describe what you did, in order. Include commands used, if any.)

1. Download **ubuntu-26.04-desktop-amd64.iso** then open oracle VM.

2. After completing the steps to create a new virtual machine, add the processor's name, type, and version, hardware base memory, processor count, and disc size.

3. Once you finish the basic needs, add ISO ubuntu-26.04-desktop-amd64.iso, then press enter, and a new terminal will show up as it loads.

4. Once the loading finishes, click next repeatedly until you get to the signup page. Enter your username and password, then click next until it shows install.

5.Install Ubuntu, and a different loading screen will appear; press enter to complete the installation, then wait for another 1-2 minutes for the sign-in page to display, sign in, and Ubuntu is ready.

3. Issues Encountered & Resolutions

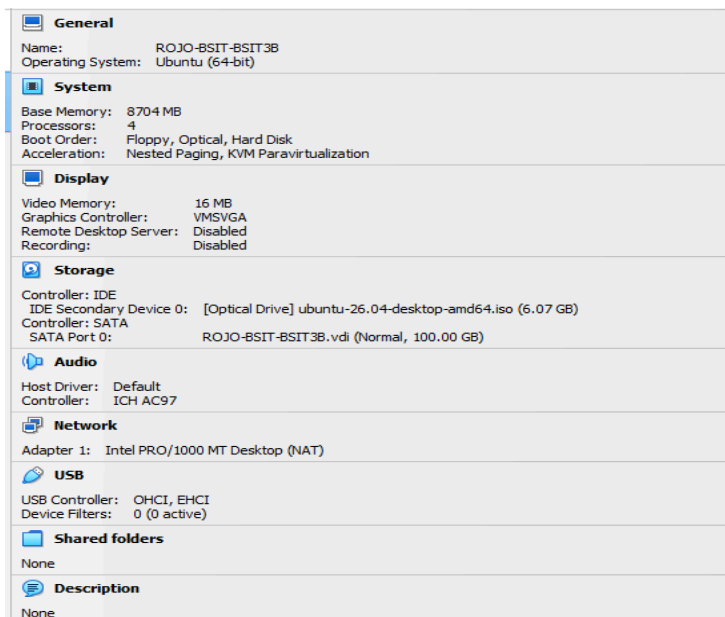

(List any problems during setup and how you fixed them.)

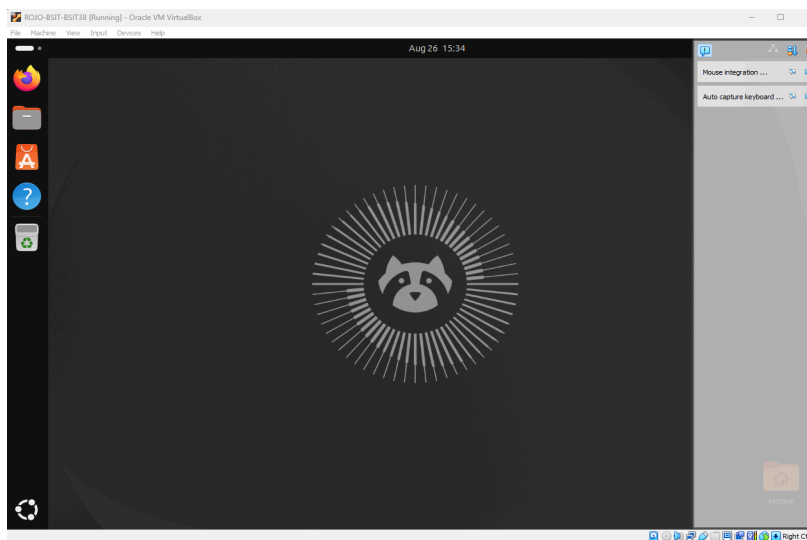

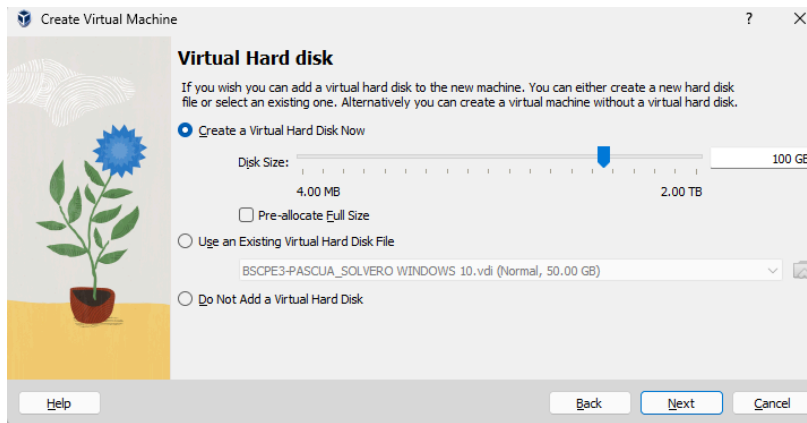

Issue	Solution
The issue i face is the ubuntu iso,it didnt compatible with the processor in the linux	I download and use ubuntu-26.04-desktop-amd64 instead of using ubuntu-26.04-desktop-arm64

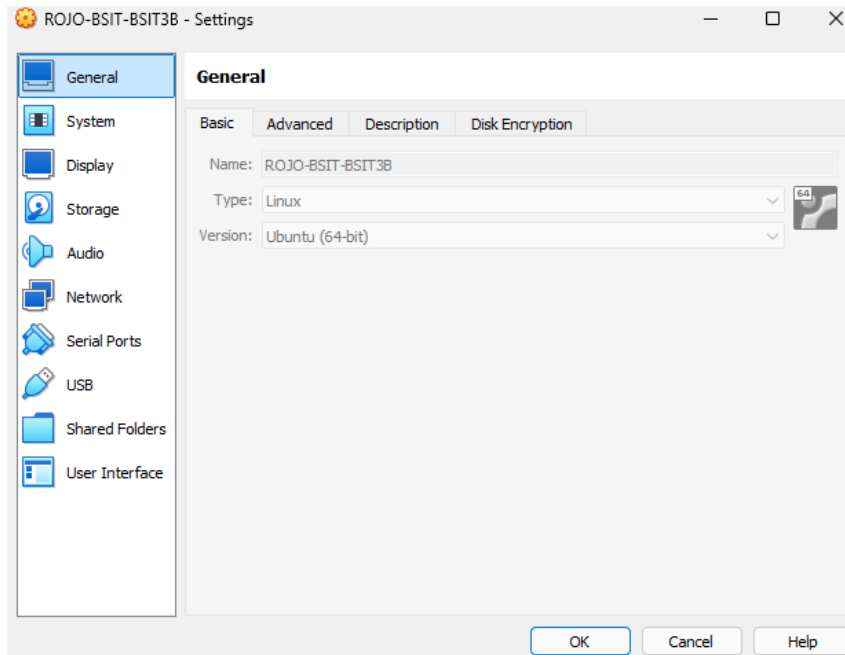

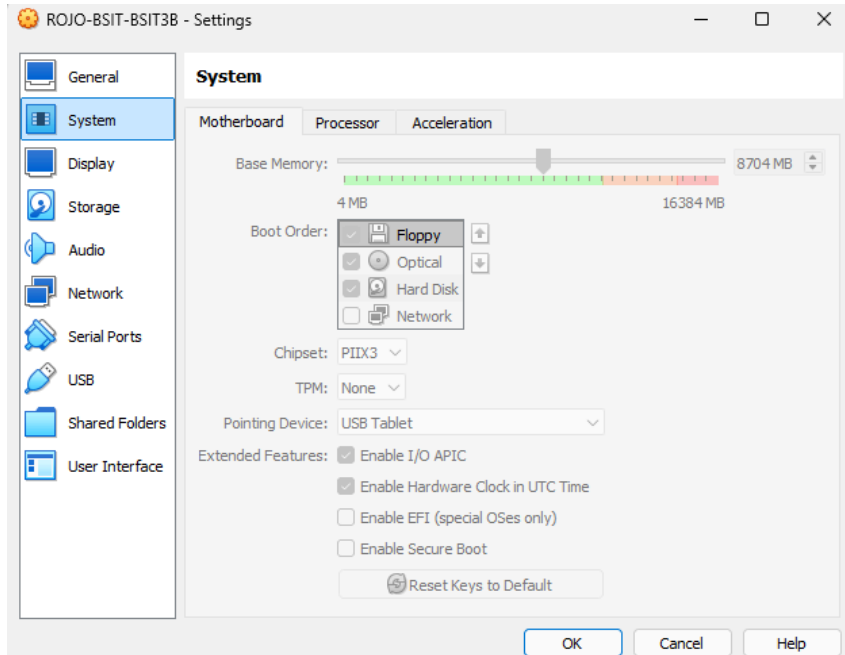

4. Verification Screenshots

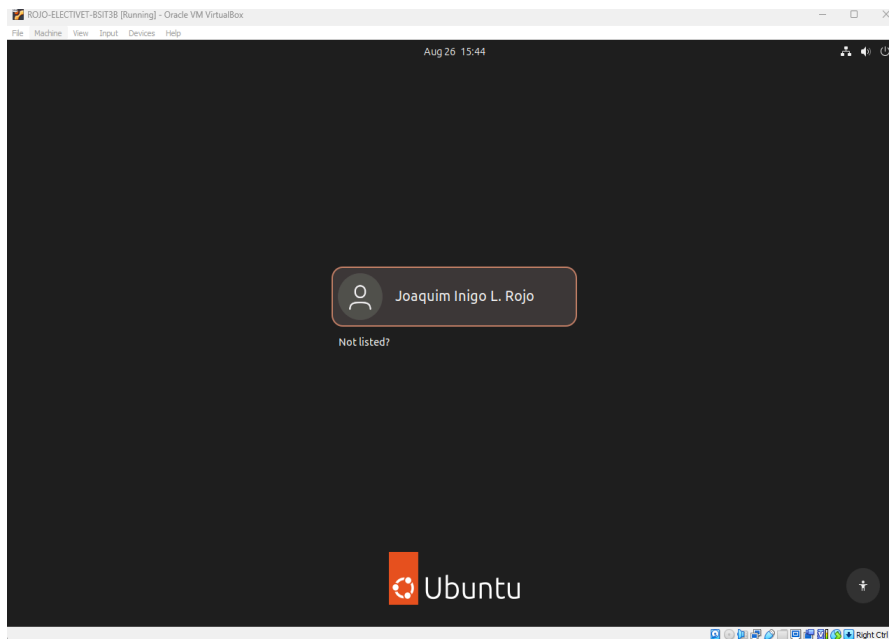

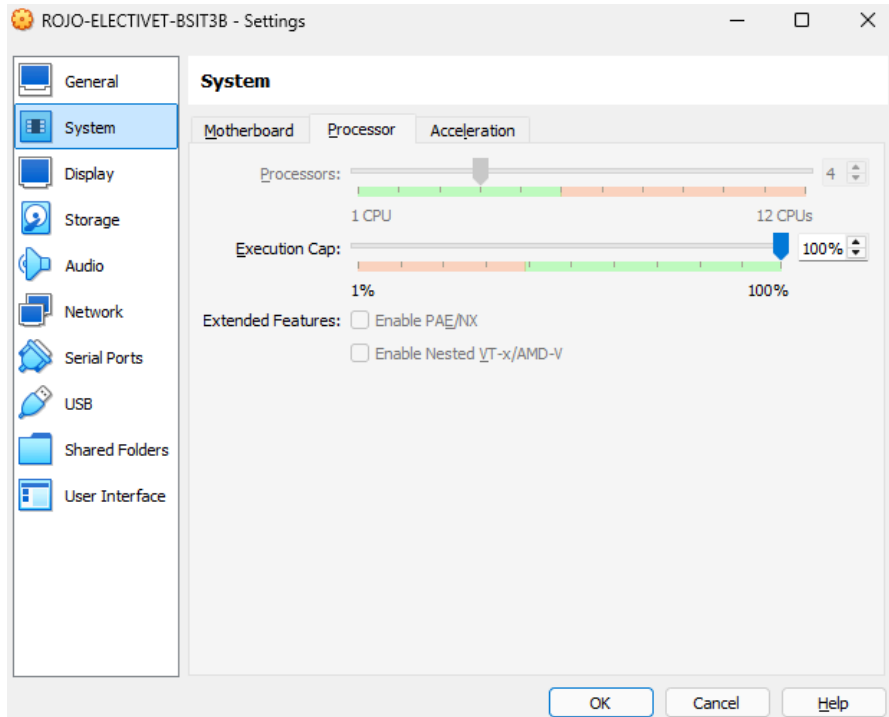

(Paste screenshots here or attach separately)

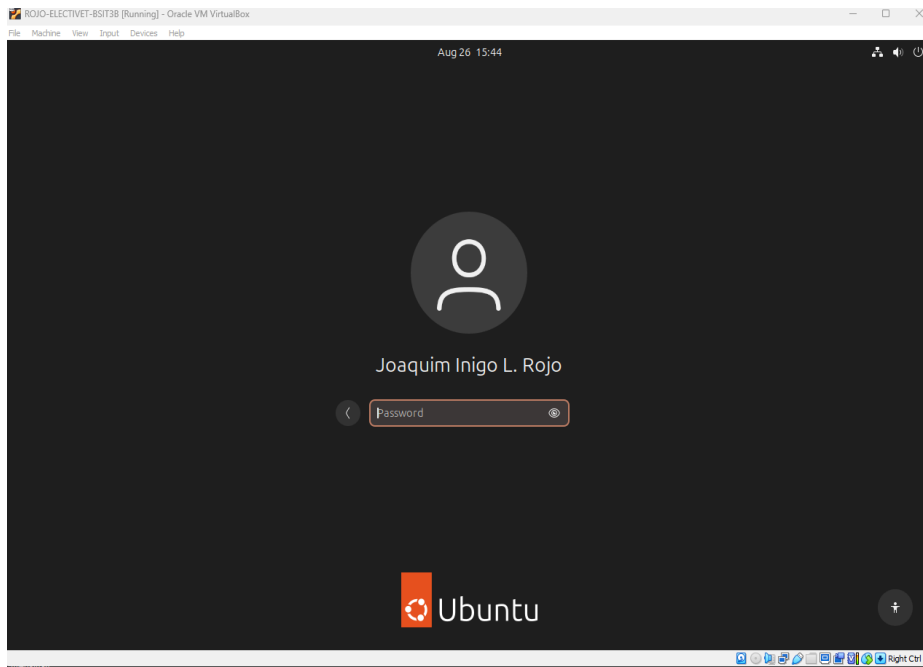

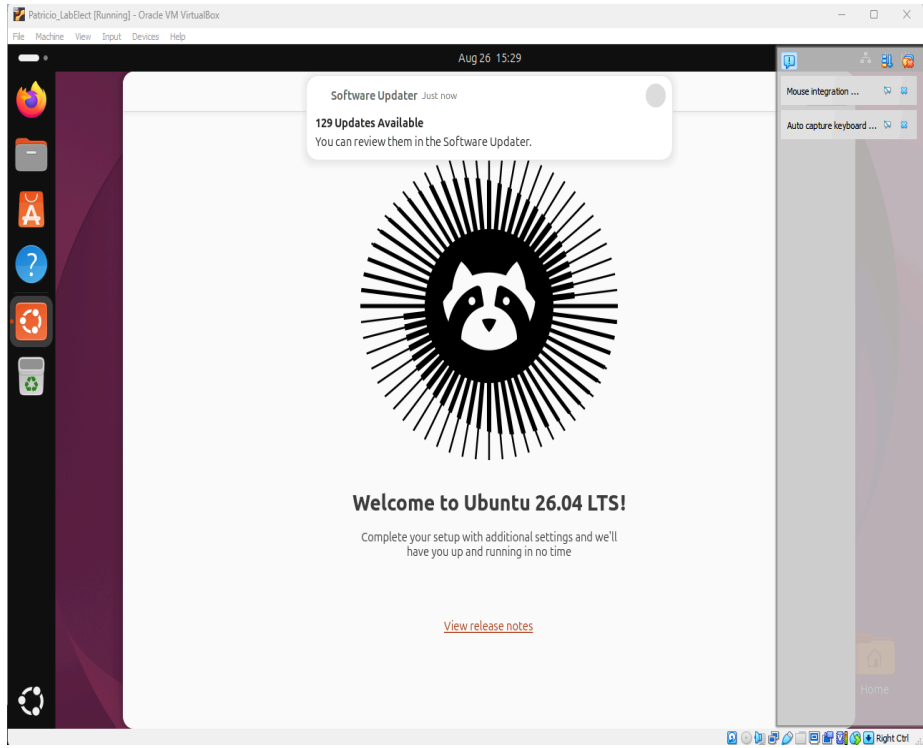

- VM Settings (Memory, CPU, Storage)
- ISO Attached / Boot Order
- Installation Progress
- Final Desktop with Terminal Open
